EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims:

Claims 1 and 6, the last line, replace "the" before "voltage condition" with --a--.

2. The following is an examiner's statement of reasons for allowance:

Claims 1-12 recite a method for operating a flash memory device that is constituted by arraying silicon-oxide-nitride-semiconductor memory cells.

The prior art does not teach or suggest at least the step of applying a positive voltage to the substrate, at least one of either a ground voltage or a negative voltage to the gate and floating at least one of either the source or the drain to reduce the threshold voltage to perform at least one of either removing trapped electrons using Fowler-Nordheim tunneling or erasing the trapped electrons by injecting hot holes created between one of either the source and the substrate or between the drain and the substrate under a voltage condition into the multi-layered dielectric layer. Therefore, the application is in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
